RESPONSE

In response to the Office Action dated 11/08/99, please
amend the above-identified patent application as follows.

IN THE CLAIMS:

Please amend Claim 30 as follows.

2930 (Amended). A method of making communication process
management decisions in two neighboring wireless over-the-air
communications systems each having its own cell sites,
comprising:

- A) maintaining signal strength in [all] cell sites at borders between two neighboring wireless over-the-air communications systems at a maximum [permissible] level [for the area immediately adjacent to each cell site];
- B) establishing an exact geographic location for a mobile unit;
- C) matching the geographic location of the mobile unit to a wireless over-the-air communication system [cell site location], and selecting a [cell site] service provider based on such location matching; and
